

## ISO COLOR CODE CHANGE FOR STRAINER SCREENS

Beginning on or around August 1, 2016 all color-coded TeeJet/Spraying Systems strainer screens will be manufactured to ISO/FDIS 19732 color standards. This will result in a color change for many of the mesh sizes currently offered and affects both individual tip strainers and line strainers. This change is being made worldwide to provide a greater level of consistency for our customers. Actual screen/mesh sizes and product performance will be unaffected by this change. A color code cross-reference table is provided below for easy identification of parts during this transition. Additionally, numeric mesh size markings have been added to all color coded line strainer screens and tip strainers equipped with wire mesh. For all-metal line strainer screens that do not feature a plastic frame, color coded dots are applied to the ferrule to identify mesh size in accordance with the ISO color standard.

Mesh Size	Current Color	Current Color Name	New ISO Color	New ISO Color Name
16	111	Gray	THE VALUE OF THE PARTY OF THE P	Brown Red
20		Beige		Beige*
24		White		White*
25/30		Yellow		Flame Red
50/60	Single Inc.	Red		Gentian Blue
80	in the second	Blue		Zinc Yellow
100		Green		Traffic Green
120	Mark Street	Brown		Brown*
200		Orange		Light Pink
